

Angel Glacier and icebergs: Jasper National Park

Note how much glacier has
receded since 1915 due to
global warming

Another photo of Angel Glacier

Athabasca Glacier in Banff National Park

Again, note the slide showing glacial recession. In 150 years, this glacier has receded two miles

My students on the summer 2002 field trip on Athabasca glacier. The sign shows where the glacier was in 1992.

Glacial Scratches at edge of Athabasca Glacier
